

Project TOGO

With the TOGO project of Friendshifts, our senior pupils took block 6 '*We are all different*' of the Peaceful School method, to a higher level.

With a rich, and above all fun program with games, photos, video's, presentations, and Marieke's extensive knowledge, our children took a trip to children in TOGO. The pupils learned in a unique way about differences and similarities between them and their peers in TOGO. But even more valuable to me was the resulting open attitude of our students towards differences. They were surprised and found the differences very interesting. Our pupils now are more aware of their own situation in a positive way. The group was always looking forward to Marieke's lessons and really enjoyed the project.

With a lot of energy and pleasure, Marieke set up and carried out the project by herself. This allowed me to watch from the sidelines and still do my own tasks. Very helpful!

Marieke also contributed to the internationalization at our school. She gave geography lessons on Africa with the 4 xWijzer -method. Groups 7 and 8 learned more about Togo through various assignments. The beautiful Togolese items Marieke brought along made it a lively subject.

In the past, a nice fundraising campaign for underprivileged children from India has been launched from her project. We will continue our collaboration next school year with the aim of connecting and focusing on education for all children.

Marieke, thank you for the great collaboration and wonderful outcome!
